

Rest Api

Introductie

X-Guard is in staat "Alarm Events" door te sturen via HTTPS gebaseerde Webhooks. Deze koppeling biedt de mogelijkheid aan externe systemen om met behulp van een simpele HTTP-server een integratie te schrijven met een eigen platform.

Alle verzoeken verwachten een status HTTP-status 2xx als reactie. Bij een andere status zal de webhook opnieuw proberen het bericht af te leveren over een door ons te definiëren periode van tijd.

JSON payload

Het volgende document bevat een voorbeeld JSON-payload. Alle gemarkeerde lijnen mogen vrij gebruikt worden. Andere lijnen kunnen wellicht ander gedrag vertonen dan aanvankelijk wordt verwacht en het gebruik hiervan is op eigen risico.

Het document bevat meer informatie dan nodig om het alarm te verwerken. Momenteel kunnen we dit bericht niet verder verkorten dan de huidige weergave.

Mist er gewenste functionaliteit? We horen het graag!

Code

```
{
  // will always be alarm
  "type": "alarm",

  // leading timestamp
  "timestamp": "2019-09-03T09:33:08.227",

  // contains alarm level
  "properties": {

    // ignore
    "levelCode": "notification",

    // Can be -15 (green), -5 (orange), or 0 (red / mandown)
    // Use this to determine the urgency of the alarm.
    // Please note: This property is represented as string
    "level": "-15",

    // ignore
    "alarmId": "82779196",
    "alarmResourceId": "d27825c1-e1d2-4a65-902a-dde998bd51f2",
    "customerId": "81415229",
    "message": "Test Melding",
```

```
"ruleId": "81415264"

},

// bound alarm message, configurable by us, per button or type of alarm
// do not use this for determining the type of alarm
"message": "Test Melding",

// object is the creator of the alarm, this will always be 'type=asset'
"object": {

  // ignore
  "type": "asset",

  // info contains the actual information about an asset
  // this part is a bit messy because of the 'properties'
  "info": {

    // ignore
    "type": {
      "id": 71057390,
      "resourceId": "ac7fb6ac-22a3-4d0e-a4b1-8f023f203176",
      "name": "X-Guard Alarm"
    },

    // this array can be used, but not all properties are guaranteed to be there for all
alarms
    // in order to retrieve the user e-mail address you'd have to iterate the property array
    // and look for 'code=email' and then read the value.
    //
    // There are some legacy properties in this list which will be removed without prior
notice.
    // The following properties are safe to use (listed by code):
    // - email
    // - phone
    // - sms
    // - allowContact
    //
    // Only 'code' and 'value' are needed to read the content of an asset property, all other
    // keys can be ignored for most use cases.
